Ecobaby Organics

The natural oils on organic or untreated cotton have not been removed by processing, so these items must be washed and dried 5 times to be totally absorbent. Adding ½ cup borax and ½ cup white distilled vinegar will help speed up this process. White distilled vinegar is a natural fabric softener, making diapers, and any cotton softer. It also removes excess soap residue on fabric and is a mold and mildew inhibitor. For odors caused by bacteria a ph neutral soap such as Bio-Kleen is recommended. **NO CHLORINE BLEACH. NO FABRIC SOFTENER ~ which coats the cotton fibers and makes them non-absorbent.**

Warranty: Against defects for 30 days from date of purchase.
